

SOLUTIONS FOR

WAREHOUSES & DATA CENTERS

Balco product solutions that accommodate operations of warehouse facilities

Expansion joints and firestop are essential aspects of large buildings, especially Warehouses and Data Centers. Expansion joint covers require flat surfaces to eliminate disruption of essential equipment to maneuver throughout the work areas. In many cases the joint areas require fire rated assemblies for safety. Expansion joint fire barriers and firestop systems keep occupants safe, and the building secure.

metacaulk® FIRESTOP SOLUTIONS:

MetaCaulk firestop systems such as Pillows, Composite Sheets, Electrical pass through devices, sealants, and sprays secure openings to allow safe passage of utilities throughout the work areas.

FIRESTOP PILLOWS
