

MANUFACTURING & PROCESSING SOLUTIONS

WHO WE ARE

Trusted partner for protecting, restoring, and upgrading active manufacturing environments. We deliver coatings, equipment rehabilitation, and surface renewal that support production uptime, safety, and long-term asset performance.

CORE CAPABILITIES

Protective Coatings – engineered coatings selected for chemical exposure, abrasion and wash-down conditions

Industrial Cleaning & Blasting – residue-free cleaning performed without disassembly

Restoration & Asset Renewal – corrosion mitigation and recoating of machinery, frames and process assets

Flooring & Traffic Delineation – high-performance floor systems with safety striping and markings for flow and storage

Hygiene-Critical – compliant coatings for production zones requiring frequent sanitation

Shutdown & Phased Execution – scoped work aligned to maintenance windows, safety plans, and production schedules

WHY BAYNUM

- ✓ Crews trained in confined space, fall protection and hazard controls
- ✓ AMPP-certified coatings expertise with documented surface-prep standards
- ✓ Active safety compliance through ISN/Avetta contractor program
- ✓ Proven delivery within maintenance windows and uptime constraints

BRANDS WHO TRUST US

Trusted by world-class brands to protect assets, minimize downtime, and maintain operational excellence across facilities.

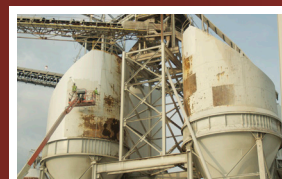

Mubea

Heavy equipment restoration combining deep cleaning, prep and durable refinishing in-place.

Carmeuse

Multi-coat corrosion mitigation system applied on elevated tanks using high-access execution.

ThyssenKrupp

Contained, time-critical interior spray program delivering bright, uniform finishes without downtime.
