

## iOS APP DEVELOPER FORM

PLEASE SEND COMPLETED FORM TO [SUPPORT@BIXOLONUSA.COM](mailto:SUPPORT@BIXOLONUSA.COM)

Name of Developer:

Name of App (as it will appear in App Store) :

App Version:

Which product(s) do you want to use?

*Specific model name – Example: SPP-R310iK*

Bundle Identifier:

*The unique CFBundleIdentifier that specifies this application. Example: com.domain.app*

Device protocol names used by this App:

*Example: com.bixelon.protocol*

*Note: if more than one protocol name is used, all protocols should be entered as a comma separated list.*

Will this app be used independently of the accessory hardware?

Yes

No

Please describe the iOS app for this accessory, including a general functional overview of the software and its key features.

## Steps for the app developer

App developers must meet all iOS Developer Program requirements. The following steps are required for apps that communicate with devices.

### 1. Specify protocol names that match the target device.

The UISupportedExternalAccessoryProtocols key in your app's Info.plist must contain one or more protocol names that match protocol names declared by the device. Your app must identify correct protocol names when enumerating connected devices using the External Accessory framework.

### 2. Confirm that the target device has completed MFi certification.

All steps up to and including production certification must be complete before you submit your iOS app for review.

### 3. Provide the unique MFI PPID for the target device in iTunes Connect.

When you submit your app using iTunes Connect, you must enter the device's unique MFI PPID in your app metadata *Review Notes* field. The device's unique MFI PPID is a ten digit number that is assigned when the device's Product Plan is created. If you are not the device developer, you will need to obtain the MFI PPID from the device developer.

Example in case of SPP-R200II (shown to the right)
