

# Patch Management Solution

## Core Managed's Patch Management Solution

With cyber threats growing increasingly sophisticated, maintaining system integrity is crucial for your business's resilience and prosperity. Our Patch Management Solution is a state-of-the-art platform engineered to bolster your digital infrastructure against vulnerabilities, ensuring your software environment remains up-to-date, secure, and operating at peak efficiency.

### Streamlined Patch Management Process

Our Patch Management Solution is a cloud-based platform seamlessly integrating with your existing IT ecosystem. This robust tool simplifies the deployment, management, and monitoring of patches across diverse devices and operating systems. Rest assured, your network stays fortified with the latest security updates, minimizing cyber threats and reducing potential downtime.

### User-Friendly Interface for Enhanced Control

Central to our Patch Management Solution is its intuitive interface, offering unprecedented control and visibility over patching processes. The dashboard provides a clear overview of your network's health, highlighting critical updates for swift action. Real-time reporting and analytics empower informed decision-making, ensuring timely patch prioritization based on severity.

### Customizable Automation Policies

Enjoy the flexibility of automating patching processes tailored to your specific needs and schedules. Our solution enables the creation of custom policies for automated patch deployment. Whether deploying patches during off-peak hours or responding to zero-day threats. Easily customize your approach to patch management.

### Intelligent Patch Deployment Engine

Our platform's intelligent patch deployment engine supports a wide array of software vendors and applications, ensuring all critical systems, including third-party applications, receive necessary updates. The engine considers dependencies and prerequisites, ensuring patches are applied in the correct order for a smooth update process.

## Stringent Security Measures

Security remains paramount with our Patch Management Solution. Employing stringent protocols, all communications are encrypted, and patches are sourced directly from trusted vendors or repositories. This minimizes the risk of malware or unauthorized modifications, safeguarding your network's integrity.

## Centralized Control for Distributed Workforces

Manage patching activities across distributed workforces or multiple locations effortlessly. Our platform offers centralized control over patching, enabling management of endpoints from a single interface. As your business scales, our solution grows with you, ensuring efficient and secure patch management.

## Advanced Scheduling Options to Mitigate Downtime

Downtime can be costly, but our Patch Management Solution mitigates this risk with advanced scheduling options. Configure maintenance windows aligned with your business operations to prevent patching activities from disrupting productivity. Silent installations keep users undisturbed, ensuring a seamless work experience.

## Assistance with Compliance Requirements

Demonstrate adherence to industry standards and regulations like HIPAA, PCI-DSS, and GDPR with our Patch Management Solution. Consistent updates with the latest patches facilitate compliance, while detailed logs and reports simplify audits and compliance checks.

## Dedicated Support for Peace of Mind

Experience unparalleled support with our Patch Management Solution. Our team of experts is ready to assist with configuring patch management policies, troubleshooting issues, or providing best practice guidance, ensuring a smooth experience every step of the way.

## Why Choose Core Managed?

Our Patch Management Solution is more than just a tool—it's a strategic asset empowering your organization to maintain a secure, compliant, and efficient IT environment. With its robust features, user-friendly interface, and unwavering commitment to security, our solution offers peace of mind in today's digital landscape.
