

Export Playlist as CSV

1.0

Universal, for macOS 11+/Music v1.1+
Find more free AppleScripts
and info on writing your own
at dougscripts.com.

Export abridged info from each track in the selected playlist to a CSV (comma-separated values) formatted text file, which can be viewed in a spreadsheet app, like "Numbers".

Universal, for macOS 12 and later only.

Installation:

To make an AppleScript available in your **Music** Script menu, install it in the Music "Scripts" folder. This is located at `[user name] / Library / Music / Scripts /`. **Music** will look for AppleScripts in this folder.

*The user Library directory may be hidden by default. To make it visible, hold down the Option key on your keyboard and select **Go > Library** from the Finder.*

If the `[user name] / Library /` folder does not contain the "Music" or "Scripts" folder, then create them and put the script(s) in the "Scripts" folder. AppleScripts will then appear in the Music app's Script menu, and can be activated by selecting by name and clicking. Be sure to also save this Read Me document in a safe and convenient place.

See the online [Download FAQ](#) for more info and video on downloading and installing AppleScripts.

How to use:

Select a regular or Smart playlist in the Music app and launch the script. Select a location in which to save the CSV file and click "Save".

It may take a few moments for very *large* playlists to process. But it's a sure thing.

Not recommended for—and prevented from—exporting the entire "Songs" library.
