

FINO

ONE-INCH LINEAR

BY: EDISON PRICE LIGHTING

SLEEK & POWERFUL LINEAR LIGHTING

The FINO product line is a 1" (25mm) linear lighting system designed for precision and architectural integration. Its flexible silicone lens enables uninterrupted continuous runs up to 65 feet, eliminating visible joints while ensuring uniform light output.

With multiple mounting options, including pendant, surface, wall, recessed flanged, and trimless, FINO adapts to various applications. It features advanced optical configurations, such as asymmetric, double asymmetric, and prismatic lenses, optimizing performance for diverse lighting needs.

The 1" extruded aluminum profile, combined with high-precision optics and seamless illumination, makes FINO ideal for modern architectural lighting. Its innovative silicone lens not only eliminates visible interruptions but also ensures consistent, high-quality illumination over extended spans, setting a new standard for uninterrupted linear lighting.

FLEX

Flexible Silicone Diffuser

Our silicone diffuser offers 65 feet [20 meters] of smooth, glare-free illumination in a slim design. Perfect for straight interior runs, it ensures consistent lighting without hotspots—ideal for modern projects.
