

PROCESSING NIRVANA IS HERE!

# IT'S A REVOLUTION IN TOLL PROCESSING!

**The profits are coming! The profits are coming!**

Never in toll processing history has it been this simple to increase your profits. Send your steel to Ferrous' new combination reversing mill and you'll get material with the tightest tolerances and the best shape, surface and finish. Take as much gauge reduction as you want. From 1/2% to 80%. Skin pass for shape and surface or cold reduce to produce any lighter gauge you want. Yields will be remarkable, waste will be miniscule, you'll get more prime lineal footage and profits to match.
