Penetration Testing & Vulnerability Scanning

We Think Like an Attacker to Proactively Reveal & Protect your Vulnerabilities

The Need

Cybersecurity breaches occur daily, and chances are that your organization will be, or has already been, hacked. You can either be reactive and rectify the immense monetary and reputational damage after the fact, or proactively scan for vulnerabilities, and use penetration testing to understand critical cyber risks and attack paths

The Solution

HolistiCyber's Penetration Testing & Vulnerability Scanning program utilizes sophisticated and advanced attack vectors against an organization's information technology assets. HolistiCyber operates at a Nation-State level of expertise as a "White Hat" attacker, in order to expose and then secure your organization's vulnerabilities

What to Expect

- An in-depth process that provides visibility to all key avenues for advanced and sophisticated cyber-attacks
- Planning and reconnaissance, threat identification and real-life testing , followed by a presentation of results
- Tests that include three key domains; attack vectors, IT systems and applications and various testing formats (Black, Grey, White Box)

HolistiCyber – Defending what matters

HolistiCyber offers end to end, state of the art, nation state-grade cyber defense services & solutions, delivered by a team of world class, multidisciplinary cyber security experts.

World-class expertise

Holistic approach

Exclusive 'We think like a hacker' methodology

Leadership

Unique access to the darknet

Practical insights

Proprietary technological and automation tools

HOLISTICYBER

DEFEND WHAT MATTERS
