

“Follow the Science”

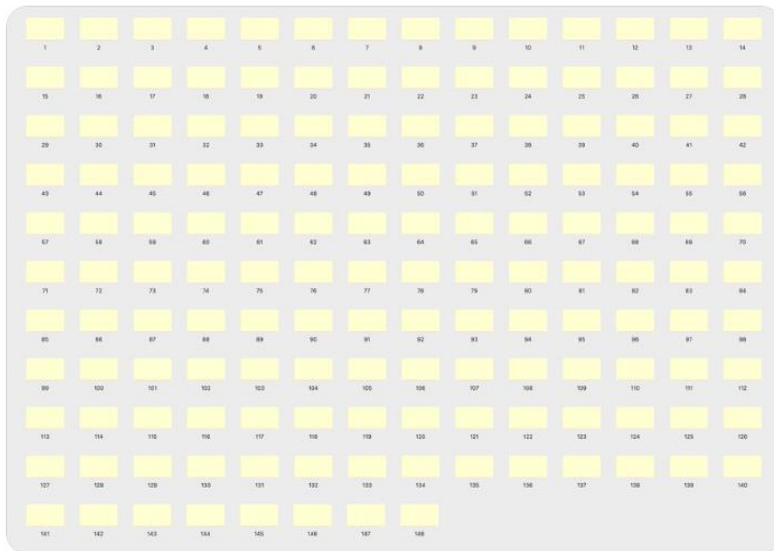

Is there a policy of “we know, but we’re not telling”. A major, long term study was carried out by the CDC on myocarditis and the COVID vaccination. This was an important study since many previous studies had detected an association. However, the CDC refused to release the results. When they were eventually compelled to by a court judgement, they released 148 pages....all blank.

Hans Mahncke
@HansMahncke

The CDC "released" a 148 page study on myocarditis after COVID-19 "vaccination" and every single page is completely redacted. This must be a new record.

The intentionality is clear – they do not want you to see the results.

Here is a link to the released document - [CDC MOVING FOIA - DocumentCloud](#)

Though this study is totally redacted, it tells us 4 things –

- 1. PRIVATE INTERESTS:** The CDC is no longer acting in the public’s interest. Whose interest, you might ask? Well, it’s the interests of those who fund them. By providing 148 blank pages on such a vital issue for public health, the CDC is demonstrating total contempt for US citizens.
- 2. COMMERCIAL INTERESTS:** Its blank BECAUSE the findings contradict their official narrative that the vaccine is safe and effective, and therefore is not in the interests of their funders who want to sell more vaccines.
- 3. LEGAL INTERESTS:** Its blank BECAUSE they would be admitting responsibility for vast numbers of injuries and deaths – and demonstrating their negligence over the previous 2 years.
- 4. COMPLIANCE, NOT SCIENCE :** When they say “follow the science” they mean follow it blindly. In other words, they expect the public to be convinced by authority figures alone, even when shown a blank piece of paper.

All that is needed is the constant repetition of assertions, the induction of fear, and the controlled censorship of media – in a word, propaganda. It’s a parent-infant relationship, and they expect the public to play the role of dumb infants.

This attitude of “do what we say without questioning it” is evident from

- **CENSORSHIP OF DOCTORS** : widespread censorship of doctors who were threatened with a loss of their license for even warning their patients of possible side effects of the Covid jab
- **EMPLOYMENT MANDATES** : employees told that they must take the jab or lose their job – with no room for questioning, or looking at the serious adverse effects of the jab.
- **CENSORSHIP OF SOCIAL MEDIA** – YouTube, Facebook where any information showing the adverse effects of the jab were systematically removed. Hundreds of thousands of personal testimonies of vaccine injury were simply deleted over-night.

“Just do what we say. Don’t ask questions. We are the Science.”
