

V-SAFE Reports with Symptom Keyword = INSOMNIA

compiled by Craig Paardekooper

V-Safe is the largest collection of vaccine testimonies on the planet.

One of the reasons why the CDC was so reluctant to release the free-text entries of the V-Safe reports is because these entries are the personal testimonies of vaccine effects – numbering 390,000 per release, and numbering millions in total.

Having censored and erased hundreds of thousands of testimonies of vaccine injury from Facebook, the government was equally reluctant to be the provider of what is the largest collection of vaccine testimonies on the planet – collected by the CDC themselves !

Perhaps this is <<the longest story ever told>>, the testimony of 1 million people.

Many thanks to ICAN (<https://icandecide.org/v-safe-data/>) who pursued the CDC through the courts until they finally conceded and began to release this data on January 15th 2024.

Data is from all 4 releases, up until June 15th 2024, reported by 1,092,715 Covid <<vaccine>> recipients. The next release is on July 15th, 2024.

Data

Data Source : V-SAFE (CDC) : download (June 2024) @ <https://icandecide.org/v-safe-data/>

Total number of V-Safe reports with symptom keyword INSOMNIA = 6518

Percentage of V-Safe reports with symptom keyword INSOMNIA = 0.35813 %

(V-Safe) Total number of Covid <<vaccine>> recipients with this symptom = 5616

(V-Safe) Percentage of Covid <<vaccine>> recipients with this symptom = 0.51395 %

Limitations

This report shows the incidence of a symptom amongst a <<vaccinated>> population of 1092715 in the V-SAFE database. The onset of a high incidence after <<vaccination>> suggests possible cause - requiring further investigation of - 1) Other databases, such as VAERS and EUDRA, 2) Clinical literature and scientific papers.

Sample of 3000 Reports with Symptom Keyword = INSOMNIA

insomnia : Case 1: ID C3F-23975-19956

Had some slight insomnia last night.

insomnia : Case 777: ID ZWF-21771-97725
insomnia

insomnia : Case 778: ID PKH-20498-08402

I wasn't thinking much of it at first but now that it's been a week and other co-workers have also complained of the same thing, I figured I would mention it. I have had horrible insomnia, waking up multiple times every night unable to go back to sleep easily. I've also had super vivid dreams when I am sleeping that have seemed to also wake me up.

Insomnia, swelling/pain over axillary lymph nodes

insomnia : Case 1255: ID DMQ-12163-07312

I didn't realize there was an additional spot to report side effects on the first day. I would like to report that when I experienced chills and muscles aches I also had a sensation of mild chest pressure. No chest pain or cough. Went away within 8 hours of all my other symptoms. Also had moderate insomnia that evening.

insomnia : Case 2863: ID YMV-29251-59665

I have had insomnia since i received my shot.

insomnia : Case 2864: ID K42-92594-59171

This monitoring started 24 hrs late for my symptoms. I got the 2nd vaccine on 1/26 at 1000; at 5pm the following started and lasted until 1130am the next day: crippling body aches and muscle pains, chills, fever to 100.6, insomnia, lack of appetite and fatigue. It was disabling for that ~17 hrs. Tylenol did little to help. I am fine and symptom free now- 48 hrs post vaccine. Thank you.

Approximately 6 hrs after receiving my 2nd dose I experienced severe symptoms which included: fatigue, severe pain in all joints, burning pain in lungs, eyes, bladder, throat. Fever 100.4 with Tylenol and ibuprofen, brain fog, insomnia (probably due to pain) . The symptoms had a sudden onset and were completely gone 48 hrs later upon awakening.

I suffer from chronic insomnia. Ive noticed Ive become drowsy (not tired/fatigued) a few evenings after each injection. After the first dose, I thought this could be simply the result of reduced anxiety. Last night I fell asleep hours earlier than usual and without my sleep medication. I slept solid for about 9-10 hours which was wonderful. Perfect side effect for me!
