

V-SAFE Reports with Symptom Keyword = LYMPH

compiled by Craig Paardekooper

V-Safe is the largest collection of vaccine testimonies on the planet.

One of the reasons why the CDC was so reluctant to release the free-text entries of the V-Safe reports is because these entries are the personal testimonies of vaccine effects – numbering 390,000 per release, and numbering millions in total.

Having censored and erased hundreds of thousands of testimonies of vaccine injury from Facebook, the government was equally reluctant to be the provider of what is the largest collection of vaccine testimonies on the planet – collected by the CDC themselves !

Perhaps this is <<the longest story ever told>>, the testimony of 1 million people.

Many thanks to ICAN (<https://icandecide.org/v-safe-data/>) who pursued the CDC through the courts until they finally conceded and began to release this data on January 15th 2024.

Data is from all 4 releases, up until June 15th 2024, reported by 1,092,715 Covid <<vaccine>> recipients. The next release is on July 15th, 2024.

Data

Data Source : V-SAFE (CDC) : download (June 2024) @ <https://icandecide.org/v-safe-data/>

Total number of V-Safe reports with symptom keyword LYMPH = 85842

Percentage of V-Safe reports with symptom keyword LYMPH = 4.71659 %

(V-Safe) Total number of Covid <<vaccine>> recipients with this symptom = 49274

(V-Safe) Percentage of Covid <<vaccine>> recipients with this symptom = 4.50932 %

Limitations

This report shows the incidence of a symptom amongst a <<vaccinated>> population of 1092715 in the V-SAFE database. The onset of a high incidence after <<vaccination>> suggests possible cause - requiring further investigation of - 1) Other databases, such as VAERS and EUDRA, 2) Clinical literature and scientific papers.

lymph : Case 1928: ID M3Z-59793-33455

Well, as I reported yesterday, my lymph nodes under my left arm are still swollen, although I think the swelling has gone down and there's no more soreness. I did get the vaccine shot in my left arm, and I'm guessing the fact that the lymph nodes under my left arm are swollen means it's a side effect. It'd be nice to confirm that with someone who might be able to tell me it's most likely a side effect.

lymph : Case 2146: ID 77M-32707-05909
I thought this might be due to something else but will report it anyways because other than it, I feel perfectly fine. On 12/26/20, I noticed swelling at my left underarm (lymph nodes

there swollen?). No discoloration there, just about 1/2 inch of swelling out, on a surface area of about 1.5 inches square. I initially thought it was a sprained muscle because that's what it felt like and I had carried a printer for a distance that day. This swelling started on the 26th and has persisted to today. So far no change.
