

## V-SAFE Reports with Symptom Keyword = UTERINE

compiled by Craig Paardekooper

V-Safe is the largest collection of vaccine testimonies on the planet.

One of the reasons why the CDC was so reluctant to release the free-text entries of the V-Safe reports is because these entries are the personal testimonies of vaccine effects – numbering 390,000 per release, and numbering millions in total.

Having censored and erased hundreds of thousands of testimonies of vaccine injury from Facebook, the government was equally reluctant to be the provider of what is the largest collection of vaccine testimonies on the planet – collected by the CDC themselves !

Perhaps this is <<the longest story ever told>>, the testimony of 1 million people.

Many thanks to ICAN ( <https://icandecide.org/v-safe-data/> ) who pursued the CDC through the courts until they finally conceded and began to release this data on January 15th 2024.

Data is from all 4 releases, up until June 15th 2024, reported by 1,092,715 Covid <<vaccine>> recipients. The next release is on July 15th, 2024.

### Data

Data Source : V-SAFE (CDC) : download (June 2024) @ <https://icandecide.org/v-safe-data/>

Total number of V-Safe reports with symptom keyword UTERINE = 127

Percentage of V-Safe reports with symptom keyword UTERINE = 0.00698 %

(V-Safe) Total number of Covid <<vaccine>> recipients with this symptom = 121

(V-Safe) Percentage of Covid <<vaccine>> recipients with this symptom = 0.01107 %

### Limitations

This report shows the incidence of a symptom amongst a <<vaccinated>> population of 1092715 in the V-SAFE database. The onset of a high incidence after <<vaccination>> suggests possible cause - requiring further investigation of - 1) Other databases, such as VAERS and EUDRA, 2) Clinical literature and scientific papers.

## Sample of 127 Reports with Symptom Keyword = UTERINE

Went to the hospital yesterday had a CAT scan from abdominal pain found out I have colitis all the sudden and my uterus is swollen and I have a bladder issue and I've been healthy!

uterine : Case 70: ID RVR-91940-46452

I am hesitant to report this because it sounds insane; but with my first vaccine, 1 hour after, I started my period 2 weeks early which is highly unusual for me. Weird coincidence and couldnt be connected, I thought. Today I was prepared in case my cycle is now off track and it has technically been 28ish days. No pms/cramps etc like I always have as a warning and again, minutes after my vaccination, started my period with incredibly increased volume and an unprecedented lack of symptoms before. Again, there is no rational way a vaccine could almost immediately induce heavy uterine bleeding. Its illogical but its such an odd correlation, in case its happening to any other women, I thought I should mention it. Its the most bizaare potential bodily stress response I could imagine

uterine : Case 71: ID K4B-26448-20074

Abnormal uterine bleeding

uterine : Case 72: ID HES-46439-50974

uterine : Case 88: ID ZU7-17761-41517

Stabbing pains in my right chest, left side back, left uterus. I am 14 days post partum from having my baby via c-section. I am terrified I am still sick. My baby needs me and I feel completely incapacitated. PLEASE, Is there anything i can do to lessen or shorten my symptoms? I am desperate.

uterine : Case 89: ID EUZ-68206-29003

Upon conferring with some peers and fellow healthcare providers, I concluded that my symptoms were vaccine related and wanted to report. For both doses, for the first three days following, I experienced moderate to at times severe uterine cramping as well as

moderate vaginal bleeding with passage of blood clots. This is abnormal because I have had an IUD in place for 2 years and have not experienced any periods or vaginal bleeding, nor have I experienced similar cramping (even pre-IUD with a normal period). This is concerning to me and other women I've spoken with who have had similar experiences.

uterine : Case 90: ID CNU-27971-62105

Light headedness, extreme cramps in uterus

uterine : Case 91: ID X45-10686-80365
