

```
// A MatDeck program that connects to sqlite databases using the
db_connect() function

// The function db_connect() is a universal function that can be used
for all sorts of DB connections, you can use it to connect to the
following databases: SQLite, MySQL, MSSQL and PostgreSQL

// Connecting to the server
conn := db_connect("sqlite", "Name", "", 0, "", "",
"sqlite_database.db")

print(conn)

// Disconnecting from the server
db_close(conn)
```
