

```
// MatDeck program to create table in mysql database

//Definition of the function NewTable
//When we make a call of function NewTable() it will create a new
table "Software"

NewTable()
{
    // Connecting to MySQL server instance
    conn := db_connect("mysql", "Name", "localhost", 3306,
"test_user", "Test123", "matdeck")

    // We will use db_query() function to create new table "Software"
    // which contains two columns Name and Number of data types
varchar
    // for string storing and Number of integer data type
    db_query(conn, "CREATE TABLE Software (Name VARCHAR(255), Number
int);")
    print("Software Table is Created")
}

// Calling NewTable() function
NewTable()
```
