

Techivation Releases the Tilt EQ (Free plugin)

Techivation introduces the Tilt EQ, a linear phase tone shaping equaliser with a unique twist. And it's Free!

Where most tilt EQs simply discard the energy they cut, Tilt EQ's Drive control captures that energy and re-injects it as harmonic saturation. The result is a tone-shaping tool that lets you brighten, darken, or rebalance a sound without the spectral content going dull or thin. Drive intensity scales with the amount of energy the tilt curve removes, so the saturation reacts musically to whatever the EQ is doing.

Beyond the Drive, Tilt EQ offers a complete tonal toolkit: adjustable tilt range and slope for control over the position and steepness of the spectral shift, mid-side processing, stereo balance to pan the entire band effect across L/R or M/S channels, and a pair of variable-slope low and high cut filters for cleaning up rumble and harsh top end. Automatic gain compensation keeps loudness consistent across EQ moves, and the Drive section runs at up to 8x oversampling for alias-free saturation.

Tilt EQ is built for fast, decisive tonal moves on individual tracks, mix buses, and masters — designed to fit naturally into the workflow of engineers who want a clean tilt curve, character when they need it, and nothing in the way when they don't.

Tilt EQ key features:

- Tilt Band Gain
- Tilt Band Drive
- Tilt Band Range
- Tilt Band LR|MS
- Tilt Band Stereo Balance
- Filter controls
- Gain Compensation
- Drive Quality
- EQ Curve Display
- Output
- Scalable user interface
- Internal On/Off Switch
- Undo/redo options

Pricing and Availability

Tilt EQ is now available at techivation.com Free of charge.

The Techivation Tilt EQ can be downloaded in VST, VST3, AU, and AAX formats for any compatible DAWs including Logic, Cubase, Ableton Live, Pro Tools, FL Studio, Studio One, etc., available for both Windows and macOS. Techivation plug-ins also support the Apple Silicon chips natively.

About Techivation

Techivation is a UK-based creator of audio and music technology. Since 2021, the company has been developing easy-to-use, versatile, and practical plug-ins to assist both beginner and professional audio and music artists in finding practical solutions. Techivation remains fully invested in its vision of producing quality tools. These tools are designed to help music producers and engineers innovatively improve their music and audio sound, simplify their workflow, and focus more on creativity.
