

Techivation Releases M-EQ

Techivation has announced the release of M-EQ, the latest addition to their M-series of plug-ins, and their first release in 2026. M-EQ is a linear phase equaliser that combines the musical workflow of classic EQs with adaptive intelligence, delivering surgical precision with just three smart, context-aware bands.

Each of M-EQ's three Smart Curve bands performs dozens of intelligent, real-time adjustments, continuously reshaping the frequency response based on your audio. This sophisticated processing allows M-EQ to achieve surgical tonal control that would typically require many traditional EQ bands.

M-EQ transforms how you approach equalisation. Instead of hunting for specific problem frequencies, you simply choose a broad frequency range and set your desired gain. M-EQ's Smart Curves then analyse the incoming signal in real-time, automatically redistributing that gain where it's truly needed. Boosts enhance only the frequencies lacking energy, whilst cuts target only areas of excess. The result is natural, musical tonal shaping that would typically require painstaking manual adjustments, all achieved with just a few intuitive moves.

M-EQ integrates an intelligent Mix Assistant that analyses the incoming audio and suggests an EQ configuration for improved tonal balance. By capturing a short segment of audio, Mix Assistant provides a fast and reliable starting point, allowing users to achieve refined results in seconds while maintaining full control over the final sound.

M-EQ key features:

- 3 Smart Bands
- Per-Band Gain
- Per-Band Smart Curve
- Per-Band Frequency Range
- Per-Band Saturation
- Per-Band Stereo Balance
- Per-Band Solo
- Per-Band Bypass
- Low-cut & High-cut
- Mix Assist
- Saturation Character
- Smart Curve Smoothing
- Spectrum Visualiser
- Output Control
- Mix Control
- Mid-Side Processing
- A/B Comparison
- Input/Output Meters
- Undo/Redo
- Scalable GUI
- Presets
- Oversampling
- And more...

Pricing and availability

M-EQ is now available at techivation.com for an introductory offer of **55.00 USD**; The original price will be 129.00 USD after **January 25, 2026**.

Crossgrade & Upgrade Offers: Users who own other premium Techivation plug-ins can purchase M-EQ for **45.00 USD**.

**Techivation Full Access Users get this plug-in for free.*

Techivation M-EQ can be downloaded in VST, VST3, AU, and AAX formats for any major DAW on the market, including Logic Pro, Cubase, Ableton Live, Pro Tools, FL Studio, Studio One, and more. It is available for both Windows and macOS with native support for Apple M-chips.

Free Trial

A fully functional 14-day free trial for M-EQ is available on the [Techivation website](#), offering users to test the plug-in before committing to a purchase.

About Techivation

Techivation is a UK-based creator of audio and music technology. Since 2021, the company has been developing easy-to-use, versatile, and practical plug-ins to assist both beginner and professional audio and music artists in finding practical solutions. Techivation remains fully committed to its vision of producing quality tools designed to help music producers and engineers innovatively improve their music and audio sound, simplify their workflow, and focus more on creativity.
