alTRAN

A person is running on a paved path that runs along a rocky coastline. The sun is low on the horizon, creating a strong backlight effect and casting a long shadow of the runner onto the path. The sky is filled with wispy clouds, and the ocean is visible to the right. The overall mood is serene and active.

We want to run our models

Interpreter

Compiler

- + Fast
- + Efficient
- + Quick startup

- Hard to write
- Long compilation
- MPS interaction complex

Interpreter: General

- Typesystem Integration
- Documentation
- Test Integration
- Extensible

A close-up photograph of a snail moving across a dark, textured asphalt surface. The snail's shell is a rich brown color with visible concentric growth lines. Its body is a pale, mottled greyish-brown. Two long eye stalks are extended forward. The text "That's all Folks?" is superimposed in a large, white, sans-serif font across the middle of the image, partially covering the snail's shell and body.

That's all Folks?

What do we need?

- Java 9
 - OSX / Linux: Special build of Java 8 available
- MPS running on Java 9

- MPS Supporting Java Processing Annotations
MPS-27653 Support Java Annotation Processors
