

Applying Trial Data

Now that you have access to the PrintVis system, it is important to load trial data so you can easily experience the functionality within PrintVis. Follow the steps below to load the sample data.

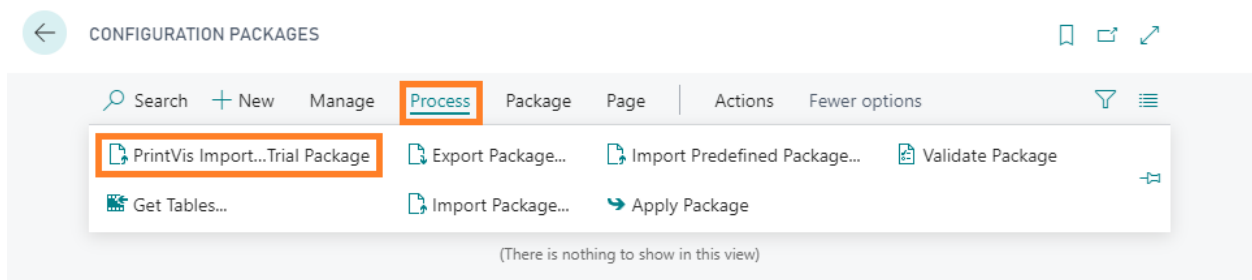

Step 1

- In the upper right-hand corner of your new Business Central instance – click the search magnifying glass.
- In the search box type “Configuration Packages”
- Select Configuration Packages from the list

Step 2

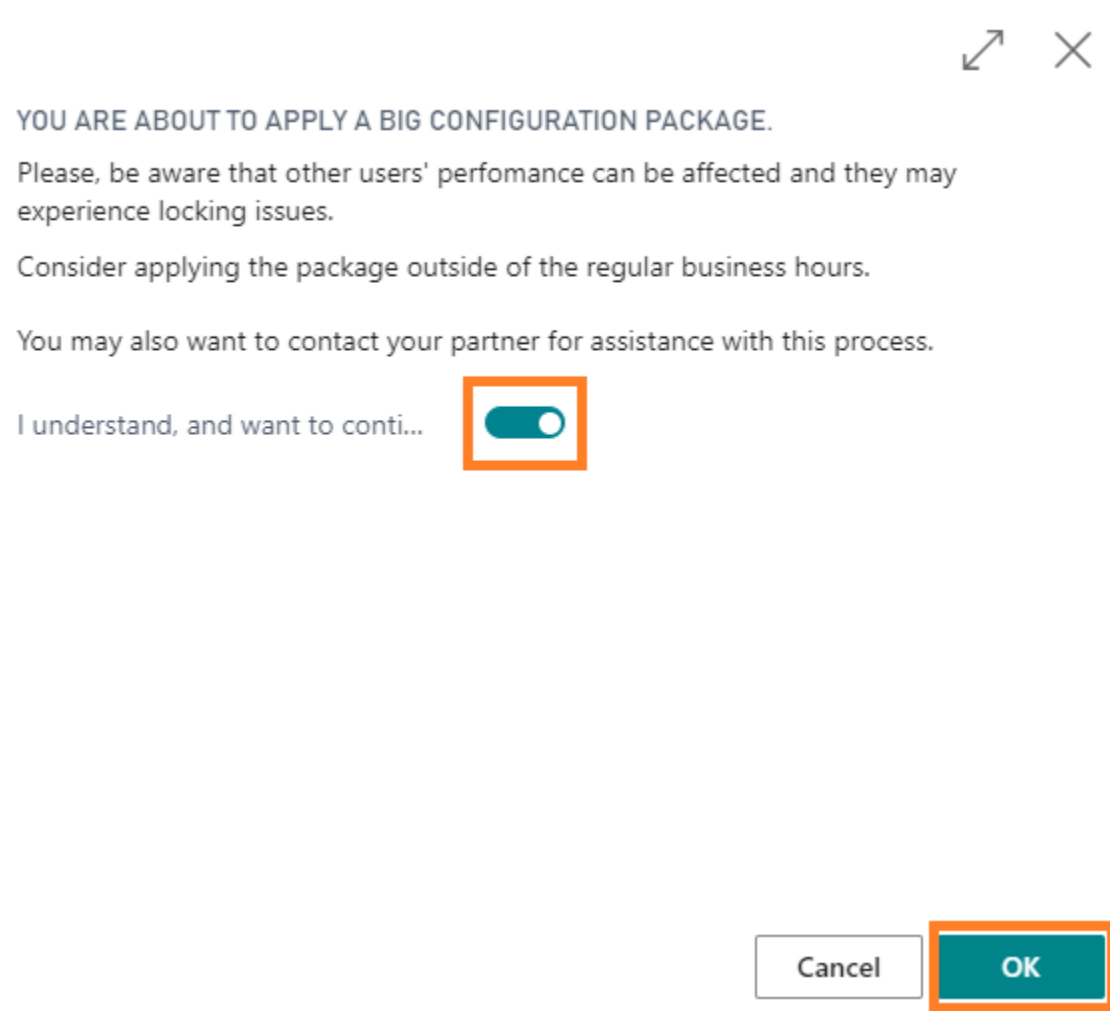

- On the configuration packages page click Process then PrintVis Import and Apply Trial Package.

- Allow approximately 10 minutes for the configuration package to download.

Step 3

- Apply the package by checking "I understand, and want to continue" then clicking OK.

- Allow approximately 15 minutes for the package to apply.
- When complete the dialog box will disappear. Close the configuration packages page using the blue arrow in the upper left corner.
