

# ALS Network Care Services

The mission of the ALS Network is to partner with the ALS community as we drive the discovery of prevention strategies, treatments, and cures for ALS; provide access to quality care and connection; and promote initiatives to improve health outcomes.

ALS Network provides customized care services, **free of charge**. Our team of professional and compassionate Care Managers provide expert advice and assistance for people living with ALS. **We are here for everyone facing this disease.**

Each person with ALS who registers for services with the ALS Network is connected to a Regional Care Manager, who provides:

- Help for families-navigating the challenges of living with ALS
- Guidance for health insurance and government benefits
- Access to multidisciplinary ALS clinical care
- Loans of vital equipment and communication devices
- Connection groups and educational materials in English and Spanish
- Access to programs and events, including educational webinars, resource fairs, and community gatherings
- Information and resources about ALS research, including assistance in locating and participating in ALS clinical trials
- Opportunities to engage in federal and state legislative advocacy efforts on behalf of the ALS community

Contact us now to register with the ALS Network and begin receiving free, personalized services, *regardless of insurance or immigration status*. You will be partnered with a Care Manager who will work with you to determine your current and future needs. Studies show that people with ALS who receive comprehensive care that is tailored to individual needs often experience an increased quality of life.

We look forward to working with you!
