

SRIPATH TECHNOLOGIES®, LLC Quality Policy Statement

Sripath Technologies® is committed to developing, manufacturing, and marketing innovative additives to enhance the performance of bitumen and asphalt for paving and roofing applications. Sripath® products are highly engineered, specially formulated, of high quality, and must meet or exceed customer expectations at all times.

Management at Sripath is committed to a highly effective quality control system ensuring that all products meet stringent specifications. The requirements of the quality system are communicated to all involved in the manufacturing of the products. All involved are both responsible and accountable for following practices to ensure that high quality products are delivered to our customers.

Continuous improvement is a key component of the quality system. Any customer complaints are promptly investigated and corrective action taken. Additionally, any deviations from internal standards are investigated and corrected to ensure all products meet our high standards.
