

Provision and manage your entire Azure stack in minutes, not days.

About StackGen

StackGen automates Azure infrastructure deployment for enterprises seeking faster, more reliable cloud operations. Our pre-configured templates and intelligent agentic orchestration reduce deployment time by 80%, serving Fortune 500 companies globally.

What we offer

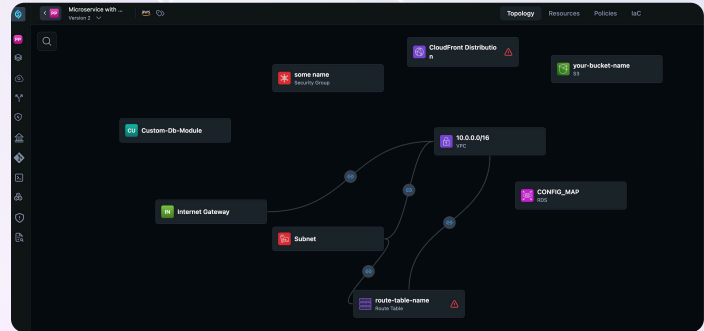

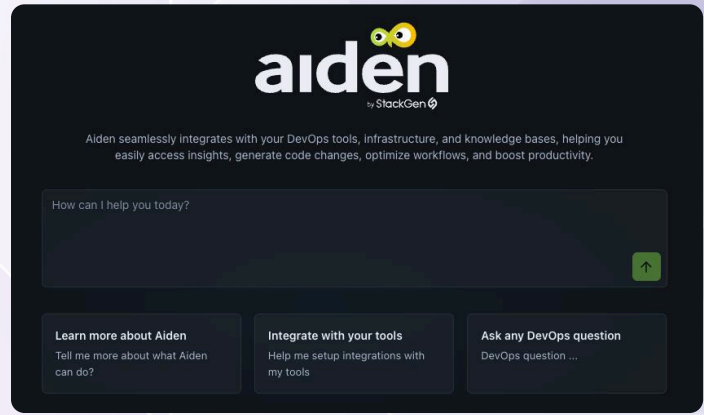

StackGen Platform accelerates Azure adoption with enterprise-grade modules and built-in compliance. Our pre-built policies cover GDPR, HIPAA, ISO-27001, CIS Azure Foundations, and SOC2, while Azure Modules provide ready-to-deploy building blocks that reduce setup time from weeks to hours. Cloud Asset Discovery gives teams instant visibility into all resources, converting existing assets into Infrastructure as Code.

Our **Aiden AI Agent** provides self-service DevOps productivity, enabling engineers to query infrastructure and execute tasks through natural language. Golden Path Workflows standardize operations across Azure and DevOps tools, while continuous improvement trains on your environment for increasingly accurate recommendations.

ObserveNow delivers unified observability across Azure services, cutting costs by 60%+ through optimized ingestion. Deploy full-stack monitoring in minutes with 300+ integrations and pre-built dashboards, ensuring compliance with low-ops deployment inside your Azure environment.

What our customers are saying

“StackGen is providing us the necessary compliance and cloud automation at scale to help drive our digital transformation.”

Arvind Gidwani
CTO, SAPNS2

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
