cervivor[®]
informed. empowered. alive.

thank you

Dear Cervivor Supporters,

As we observe Gynecologic Cancer Awareness Month (GCAM), we are reminded of the importance of raising awareness for cervical health and advocating for those impacted by all gynecologic cancers. While our mission is deeply rooted in the mission to end cervical cancer, we recognize that ovarian, uterine, vaginal, and vulvar cancers also deserve our attention and advocacy, as they too experience the stigma and challenges faced by those affected by cervical cancer.

We are grateful for your support and dedication to this mission. Your commitment has empowered individuals to navigate their gynecologic health journeys with strength and resilience. Together, we've cultivated a community that provides support, understanding, and hope for those affected by gynecologic cancers.

The 2024 GCAM Social Media Kit is a vital tool in disseminating crucial information about the prevention, screening, and treatment of these cancers. By leveraging social media's vast reach, we can engage a diverse audience, raise awareness, share resources, and foster discussions about gynecologic health. This collective effort plays a crucial role in the prevention and early detection of all gynecologic cancers.

Let us continue to break the silence surrounding gynecologic cancers, break the stigma, and strive for a world where no one faces this journey alone. With your help, we are making a difference—one post, one share, one hashtag, and one conversation at a time. Join us by advocating for initiatives aimed at eliminating cervical cancer as we know it, and acknowledging the awareness needs for all gynecologic cancers.

Thank you for driving our mission forward. Your support fuels our determination to create a future free from the burden of gynecologic cancers.

With heartfelt appreciation,

Team Cervivor

How to Use this Toolkit

With over 100,000 new cases of gynecological cancers diagnosed in the U.S. each year, raising awareness during GCAM is crucial. Here are some ways to amplify the message.

- **Graphics and Visuals:** Share impactful visuals to grab attention. Include images of survivors, statistics, and prevention methods. Use our pre-designed graphics and share from our main Cervivor pages!
- **Hashtags:** Use our official hashtags to join the conversation and increase visibility. #Cervivor #CervicalCancer #GCAM #EndCervicalCancer #WeAreCervivor
- **Posts:** Customize the pre-written posts to share information about cervical cancer, prevention, and screening and if you're a patient, survivor, and/or thriver, connect your personal story too!
- **Educational Content:** Share informative posts, infographics, or videos to educate your audience about cervical cancer. Use credible resources like Cervivor, Centers for Disease Control (CDC), National Cancer Institute/National Institute of Health (NCI/NIH), American Cancer Society, the World Health Organization (WHO), and more! Don't forget to provide links to resources like our website, informative articles, and other trusted health organizations.
- **Events and Activities:** Promote any upcoming events, webinars, or campaigns related to cervical cancer awareness. You can always find events at Cervivor.org/events/.
- **Call to Action:** Encourage your audience to take action, such as scheduling screenings or sharing important cervical cancer information.
- **Engagement Challenges:** Create challenges to engage your audience, such as sharing personal stories or encouraging friends to schedule screenings. Did you know? Cervivor has a large database of written stories on the website, a YouTube channel, and a podcast!

September is
Gynecologic Cancer Awareness Month!

Have you scheduled your
cancer screening yet?

HPV
VACCINATION
is cancer prevention.

CAPTION:

September is Gynecologic Cancer Awareness Month! Let's work together to raise awareness about the importance of early detection, the importance of HPV vaccination, and preventive care for all gynecologic cancers. Together, we can make a difference! #Cervivor #GCAM #EmpowerYourHealth #BelowTheBelt

CAPTION:

Did you know? HPV is a leading cause for some gynecologic cancers. Preventing HPV infection is key to preventing cervical, vulvar, and vaginal cancers. Get the HPV vaccine – it's cancer prevention! #Cervivor #GCAM #EmpowerYourHealth #BelowTheBelt

CAPTION:

Screening and HPV vaccination make cervical cancer mostly preventable, and early detection improves outcomes for some gynecologic cancers. We can reduce the burden of gynecologic cancers in our generation! Stay informed about screening and prevention along with the common symptoms associated with gynecologic cancers.. #Cervivor #GCAM #EmpowerYourHealth #BelowTheBelt

CAPTION:

Don't delay – schedule your gynecologic cancer screenings today! Routine check-ups and early detection are crucial for preventing and treating gynecologic cancers. If you experience any unusual symptoms such as irregular bleeding, pelvic or abdominal pain, or bloating -- contact your physician for further discussion. Our community is here to remind you to take control of your reproductive health! #Cervivor #GCAM #EmpowerYourHealth #BelowTheBelt

CAPTION:

In the U.S., over 114,810 new cases of gynecologic cancer are diagnosed each year. Get screened, get vaccinated, and stay educated – knowledge is power in the fight against gynecologic cancers! #Cervivor #GCAM #EmpowerYourHealth #BelowTheBelt

CAPTION:

September is Gynecologic Cancer Awareness Month! We're dedicated to raising awareness about gynecologic cancers and promoting early detection. Join us in educating others and advocating for preventive care during this critical month. #Cervivor #GCAM #EmpowerYourHealth #BelowTheBelt

CAPTION:

HPV (Human Papillomavirus) is a leading cause of some gynecologic cancers. Effective communication about HPV vaccination by medical professionals is crucial. Let's work together to ensure that the benefits of HPV vaccination are understood and embraced, contributing to the reduction of gynecologic cancers. #Cervivor #GCAM #EmpowerYourHealth #BelowTheBelt

CAPTION:

Did you know that only a few gynecologic cancers are mostly preventable or detectable through early screening? This Gynecologic Cancer Awareness Month, let's empower each other with knowledge and encourage regular screenings for early detection. #Cervivor #GCAM #EmpowerYourHealth #BelowTheBelt

CAPTION:

Raising awareness about gynecologic cancers is crucial, especially in underserved communities. By sharing information and resources, we can help bridge gaps in understanding and access to life-saving preventive care, promoting health equity for all. #Cervivor #GCAM #EmpowerYourHealth #BelowTheBelt #HealthEquity

CAPTION:

Evidence-based knowledge is a powerful tool in the mission to reduce gynecologic cancers. Let's stay informed about the latest recommendations for screening, HPV vaccination, and early detection. By sharing accurate information, we can empower individuals to make informed decisions about their reproductive health. #Cervivor #GCAM #EmpowerYourHealth #BelowTheBelt #KnowledgeIsPower

PUBLIC HEALTH ANNOUNCEMENT

CAPTION:

Public Health Alert: September is Gynecologic Cancer Awareness Month! Get screened, get vaccinated, and know the symptoms. Let's reduce the burden of gynecologic cancers together! #GCAM #GynecologicCancer #PreventionMatters

CAPTION:

Did You Know? Only a few gynecologic cancers are mostly preventable or detectable through early screening! Start the conversation with your doctor and find the proper screening guidelines for you! #GCAM #GynecologicCancer #EarlyDetection

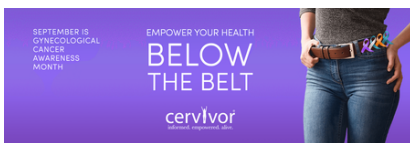

A Friendly Reminder:

HPV vaccination is cancer prevention!

CAPTION:

HPV vaccination is cancer prevention! Let's work together to reduce the risk of HPV-related cancers. No one should die from preventable cancers! #GCAM #GynecologicCancer #HPVvaccination

CAPTION:

Break the stigma around gynecologic cancers! Knowing the risk factors and symptoms, screening, and HPV vaccination can reduce many cases. Stay informed and let's create a future with fewer gynecologic cancers! #GCAM #GynecologicCancer #Prevention

KNOWLEDGE IS POWER.

STAY INFORMED.

CAPTION:

Did you know? Screening and vaccination can prevent up to 90% of cervical cancers and reduce the risk of other HPV-related gynecologic cancers! Stay informed, get screened, and get vaccinated! #GCAM #GynecologicCancer #PreventionMatters

Check out these other impactful ways to volunteer with Cervivor, Inc. Ready to make a difference? Email us at info@cervivor.org for more details on current opportunities to contribute to our mission.

- **Blog Contributor:** Share your story, experiences, and insights by contributing articles or blog posts for Cervivor's website. Your personal journey can inspire and provide valuable information to others. Send us an email at info@cervivor.org!
- **Event Volunteer:** Assist in organizing and running events such as awareness campaigns, fundraising events, or educational seminars. Tasks may include event planning, logistics, and on-site support.
- **Community Outreach:** Represent Cervivor, Inc. in your community by distributing informational materials, organizing local events, and engaging with local organizations to spread awareness about cervical cancer prevention and early detection.
- **Fundraising Volunteer:** Support fundraising initiatives by organizing events, reaching out to potential donors, or participating in existing campaigns. This can include both online and offline efforts. Fill out [this quick form](#) and we'll have someone connect with you!
- **Advocacy and Policy Volunteer:** Get involved in advocating for policies that support cervical cancer prevention, early detection, and improved healthcare. This may include participating in advocacy campaigns, writing letters to legislators, or attending advocacy events.
- **Translation Services Volunteer:** If you are bilingual or multilingual, offer your services to help translate educational materials, resources, or communications to reach a broader audience.
- **Research and Data Entry Volunteer:** Assist in gathering and organizing data related to cervical cancer, treatment options, and support services. This information can be valuable for improving awareness programs and resources.
