

Take Control of Cloud Spend With Cloud Optimize Service

According to Gartner, up to 35% of cloud spend is wasted on unused or underutilized resources. Furthermore, by 2025, 50% of organizations will prioritize workload placement to reduce costs, leveraging hybrid and multi-cloud strategies. By 2026, 75% of enterprises are expected to adopt hybrid or multi-cloud approaches to optimize performance, cost, and security. CtrlS Datacenters aims to provide a comprehensive solution that simplifies governance, ensures compliance, and aligns IT operations with business goals.

Common Challenges of IT Leaders

Increased Complexity in Cloud Environments

Unpredictable & Redundant Costs

Lack of Compliance & Security

Lack of Operational Efficiency & Agility

Uncertainty About the Right Infrastructure

Are you facing these too?

There's a solution to prevent them

Maximise Efficiency with Cloud Optimization

Align with Strategic Goals

Cloud optimization aligns with key strategic goals such as cost reduction, agility, and digital transformation, leading to 5-10% improvement in RoI

Reduce Financial Impact

On average, companies can save 20-40% of their monthly cloud spend through proper cost management, workload right-sizing, and strategic use of cloud services

Gain Competitive Advantage

In today's digital-first world, businesses that optimize cloud costs gain a competitive edge with freedom to innovate at scale

Take Control of Your Cloud Investment with CtrlS Cloud Optimize Service

Cloud Optimize is a holistic solution designed to tackle escalating cloud costs and unlock the full potential of hybrid and multi-cloud strategies. By leveraging AI, advanced cost-management techniques, and industry-specific security solutions, the service aims to provide up to 50% cost savings and a 35% improvement in operational efficiency

Cloud Cost Optimization

Reduce cloud spend with hybrid cloud strategies, and improve efficiency while maintaining SLAs.

AI Optimization

Leverage generative AI to drive innovation, and build AI-driven business use cases to stay future-ready.

Security Optimization (Sec Optimize)

Get industry-specific SOC tools for monitoring and threat response, while ensuring compliance with tailored security solutions.

Software Optimization (SW Optimize)

Leverage our expertise in third-party licensing (virtualization, database), and cost-saving alternatives for IaaS-based workloads.

Unlock a Host of Benefits with CtrlS Cloud Optimize Service

Lower Costs: Save up to 50% by reducing cloud, software, and operational expenses

Enhanced Security: Minimize risk with advanced cybersecurity, global compliance, and AI-driven threat response

Future-Ready AI: Unlock innovation with AIOps-driven, automation-enabled services

Tailored Solutions: Get customized hybrid cloud, licensing, and SOC solutions to fit your needs

Increase Operational Efficiency: Streamline cloud operations and boost performance by up to 35%

Enhance Business Outcomes: Align IT operations with business goals to drive efficiency, innovation, and growth

Success Stories:

- A multinational investment firm with presence in over 15 countries was seeking a partner that will ensure robust security, help meet global compliances and regulations while minimizing costs. CtrlS' SecOps solution helped the customer meet global compliances and achieve 20% cost savings.
- A global telecom company was scouting for a partner to reduce operational costs through predictive insights and automation and CtrlS came up with a solution that fulfilled all the requirements of the customer through AI bots, automation and self-healing mechanism.
- A leading financial services company wanted to enhance scalability & operational efficiency for hybrid cloud environments and CtrlS with its deep experience and cutting-edge technology tools introduced cost-tracking mechanism across cloud environments and optimized workloads, resulting in 50% cost savings, improved scalability during peak demand & overall governance.
